Dr Agarwal is a wonderful specialist. He takes the time he needs with his patients so they fully understand how to help themselves and why. He is very thorough and breaks down your plan of care very clearly.
I haven't been the easiest patient because I'm very stubborn but he has always been very patient, honest , direct and real with me when it comes to taking care of myself and my overall health. I've been a patient of his for 4 years and I don't have any complaints. He has helped me to learn about my asthma and sleeping and how much just breathing and sleeping well impacts my overall health. I appreciate the education and support I have received from him.
Scheduling has never been an issue (like it has been with other specialists) his staff is extremely helpful and friendly and I would absolutely recommend him as a doctor to anyone .

I've been seeing Dr Agarwal for a little over a year now and have already experienced better quality of life by implementing some of his recomendations. He was the only person that ever diagnosed my shortness of breath as asthma and started me on a maintenance inhaler that has improved my breathing considerably. While I do have mild apnea, I wasn't able to adapt to a CPAP machine and Dr. Agarwal suggested sleeping with a wedge pillow which definitely improved my sleep quality.

I only gave him 4 stars instead of 5 due to the excessive wait time of over 40 minutes that I have experienced twice.

I had an outstanding experience with Dr. Agarwal. From the moment I walked into the office, I felt welcomed and at ease. Dr. Agarwal is exceptionally understanding, compassionate, and genuinely caring. He took the time to listen to my concerns, thoroughly explain my sleep issues, and offered practical, personalized solutions that were easy to understand. His competence and expertise in the field are evident, and I felt confident in the treatment plan he recommended. The staff was also professional and pleasant, ensuring a smooth and comfortable experience throughout. Dr. Agarwal's caring approach and skill truly made a difference. Since starting the recommended treatment, I've noticed a significant improvement in the quality of my sleep and overall well-being. I am so grateful for Dr. Agarwal and highly recommend him to anyone seeking help for sleep disorders. He truly goes above and beyond to ensure a positive and high-quality patient experience

Dr Agarwal helped me understand what exactly is (and is not) sleep apnea. He clarified some misconceptions I had as well. His evaluation and care plan has been straightforward and this has allowed me to get going on CPAP without delay and onward to better outcomes.

Dr. Agarwal is my mom's doctor. He is very caring, accessible, and competent. My mom had undiagnosed sleep apnea with COPD for years. Dr. Agarwal diagnosed her with sleep apnea, and she has significant improved on the CPAP therapy. Her chronic headache, fatigue, and anxiety has lessen. She has more energy, better mood, and better sleeps in years. The doctor is also very accessible.We are able to call in when she has coughing problems and able to see the doctor the same day on multiple occasions. Dr. Agarwal took careful history notes of my mom's conditions and progress so and follow up thoroughly. We completely trust his expertise. Highly recommend his care for your family.

Sanjay Agarwal has been an amazing Dr so far. I suffer from acute sleep apnea and he has been very supportive and very informative, sharing with me the cause, symproons and impacts apnea has on health. He is proactive , following up with treatments, recommendations and takes corrective action based on how I respond to my treatment. I am pleased to have him as my Dr. and I'm sleeping much better and staying healthier as a result.

Meeting Dr Agarwal was a blessing. i visited him to check on my sleep apnea, pulmonology tests and get guidance on a few other health problems i faced. He goes the extra mile to build rapport, have an engaging conversation, share reference materials that would help in gaining more knowledge about my sickness, show diagrams or videos to further explain the diagnosis and does a thorough job. I am very pleased with his service and with the way i was treated being a new patient with him. His staff is well mannered, patient and most importantly treats everyone with respect. A special call out for Hayley (nurse at the reception). She is amazing, very professional and honestly an asset to the clinic. For all new patients, dont think twice and make Dr Agarwal your primary doctor.

Dr. Sanjay Agarwal is an amazing doctor. He is my favorite doctor. Why? Because he is truly a warm, friendly, and caring person. Always goes above and beyond to help his patients. I came to Dr. Agarwal suffering from a persistent dry cough. He immediately diagnosed me as having chronic Sleep Apnea. I was skeptical that my dry cough would be related to Sleep Apnea but to my surprise my cough and other minor symptoms related to having chronic Sleep Apnea all virtually disappeared after I started using my prescribed CPAP machine. My whole life and health has dramatically improved ever since and I have Dr. Agarwal to thank for it all.

This group is willing to work with people and is compassionate. They worked out a payment for me when my insurance was canceled to help me out and I really appreciate their care. I was able to find out what has been the issue with my sleep and blood oxygen levels dropping at night and am confident that the plan moving forward will improve my overall quality of life. Thanks Dr. Agarwal for helping where you could. I was able to see another specialist in San Francisco based on Dr. Argarwal's recommendations to see an ENT. Now, I am also working with a doctor whose passion is also to help, out of Stanford, that I was connected to to help my anxiety related breathing issues. I believe muscle training therapy from Stanford along with the regimen of medicine and medical machine assistance from Dr.Agarwal will be a game changer for me as far as helping with my headaches and anxiety symptom.

Dr Aggarwal really helped my mother. She was having severe breathing issues and he slowly worked with her in resolving the multiple issues she was having. It was like peeling an onion, and he patiently worked with her. He talked to her directly, and gained her confidence which helped her a lot in adapting to the treatment plan.
The office staff is also good. I have had good experience with scheduling appointments and access to any other information I need.
I will recommend Dr Sanjay Aggarwal to anybody looking for a pulmonologist.

Dr Agarwal is a lifesaver. The office is located on a big 2 story building off of Montague before it turns into Landess. The office is on the second floor, I usually take the stairs but there is an elevator available if there is any mobility issue, which is convenient. The office is towards the back and waiting room is a little small. The staff is very busy but will acknowledge you promptly which I appreciate if I have to wait.. luckily the wait wasn't long.The staff are friendly and are great at answering any questions I have regarding appointments and seem to do a thorough job with gathering my current and past medical history and vital signs. After the usual info update on my condition the assistant escorts me to a waiting room with some pretty nice leather chairs that were comfortable to sit on while I waited. The doctor was very pleasant and discussed my current trends with using a CPAP. Previously, Dr Agarwal had discussed with me how poorly my breathing was at night and said it was very important for me to use this machine. I knew my sleep wasn't good and I felt sleepy at work and less energy during my waking hours. After using this machine I can honestly say I feel new life has been given to me. I have more energy, I feel more alert at work, I am more happy and I feel like I am only just beginning to get better! The machine takes time to perfect, most importantly I think I was using the wrong size nasal mask, it comes with three sizes small mediumand large, the medium is what i needed. There is a measurement guide which comes with the machine. Also adjust the settings, I had to turn off the humidifier settings because it kept making my mask too wet and chest feel tight when i woke.. After turning off the humidifier and getting the correct sizes for my mask I was feeling great. Dr Agarwal discussed with me the purpose of the machine, the importance of getting good sleep and breathing without airway restrictions. Dr Agarwal was patient and able to answer my questions and concerns fully and said now my breathing is much improved and that he wants me to keep using the CPAP which i will gladly continue to do 😁😁 I'm very satisfied with Dr Agarwal and his staff,I would recommend this to anyone who is feeling sleepy and less energetic and needs to see a sleep doctor. It was probably one of the best decisions of my life to come here.

I am a 58 year old male with severe COPD. I also have severe sleep apnea. I have been coming to Doctor Agarwal for four years. I have left comments before on various web sites for him and his staff. I recently had a PFT in his office and then a follow up appointment. His staff is great! They are extremely professional and friendly. In the front office Guille stands out as awesome. Doctor Agarwal truly cares about his patients. He takes the time to get to know you and your history. He also takes the time to educate you on your issues. He has taught me how to deal with and take control of my illnesses. I highly recommend Doctor Agarwal.

My husband and I have sleep apnea .My problem is that I snore and open my mouth when I sleep so I don't get enough oxygen going to my blood and brain which makes my blood a little thicker, causing my heart to pump harder. My primary doctor even referred me to blood specialist thinking that I may have blood cancer. My specialist doctor referred me to to see a sleep apnea doctor. That is when I saw doctor Sanjay Agarwal who is very friendly and very professional. My husband also doesn't get enough oxygen cause he breath through his mouth when he sleeps. Most of the time when he woke up his BP was very low and he would feel dizzy. Since Dr. Agarwal prescribed us the CPAP machine my husband and I don't have any more problems with dizziness or our blood. I'm very thankful for everything that Dr. Agarwal has done to help my husband and me.

1st appointment (1 hr late) ==> 2nd appointment by Zoom (no show) ==> 3rd appointment by Phone (no show again).

Billed for 1 appointment, 2 tests, totaling 3 charges with 0 follow-up.

The doctor left a voicemail "apologizing" for his no shows while blaming that his patients often ask a lot of questions and he just can't get them to "SHUT UP".

There's a reason his schedule seems so available compared to other pulmonologists/sleep doctors.

Would it be possible that the doctor jam packs his schedule and treats patients as dollar signs?

He left me feeling like a transaction, not a patient.

UPDATE 1/4/2021 (reply to business owner)

Nothing "vengeful", just facts:

I still have the doctor's voicemail apologizing and blaming the no show on patients.
I still have my log history showing the Zoom wait time, and real # of call attempts made.

Highly suggest searching the doctor by his full name vs business name paints a different picture.

Best of luck to everyone in finding a good doctor.

Response from the owner 4 years ago
We are not surprised that this vengeful post is on several sites. Per my review with Dr A and staff, six attempts to book follow up visit after your consult 5 months ago, were unsuccessful as your GOOGLE PHONE either rejects it or Voice messages are unreturned. You hung up after waiting for only 4 min on Zoom follow up; and Dr A called you during vacation for a 'Face time' visit, but your google phone blocked him again. We can only do so much and request folks to be proactive in their healthcare.

Its SAD that you painted such a negative image, by play of words, but its true that some patients are sicker or take a longer time to comprehend test results/ care plan but we try our best to help our multilingual patients, whatever it takes to get the message across including education in the room. Payment for a patient visit is fixed by insurance companies leaving us no choice. Just because we bent over backwards to accommodate you does not mean we are not busy like other 'pulmonologists'. You will still need to pay your deductible as its illegal to write it off and calling staff repeatedly is not going to change it. We wish you the best in finding another specialist and an optimum health in 2022 - Manager.

I was referred here by my primary physician out of Valley health plan (VHP). The front desk failed to verify the insurance before the appointment date and time. They went ahead and scheduled me. I arrived today from my appointment I waited for about four months only to find out that they don't accept my insurance... This is rude And inconsiderate of a person's time. Next, they were trying to offer me to pay cash ($200) for the appointment, not even being aware of financial rules (patients under state insurance lose their coverage if they pay cash for ANY medical appointments).
I'm disappointed in the clinics failure to do some thing as simple as validating insurance prior to the visit.

Your suggestions are genuine, and we wish there was a simple solution. Team members take time to grasp the truly complex healthcare payment system we have and take months to learn, that gets modified again. We sure wish you did not have to travel to office for nothing - somebody erred and we take collective responsibility. Mere fact that you had to wait for 4 months itself says how challenging and frustrating things can get.

I went to Dr. Sanjay Agarwal office on 6/20/2019 due to my rheumatology doctor referral. The purpose to visit Dr. Sanjay Agarwal is to get info of any medication currently I am taking affect lung disease. I called insurance and Doctor's office to make sure Dr. Sanjay Agarwal was paticipating/ accepting my plan before I made this appointment. The answer was "yes". I went there, the front desk ask me to pay $20 for specialty co-pay. Dr. Sanjay Agarwal suggested me to go for lung wash, I told him the purpose I came today for medication I was taking affect lung issue. Dr. Sanjay Agarwal said he would ask front desk to send info to my doctor. Unfortunately, my doctor was not getting information from Dr. Sanjay Agarwal. So my doctor had to send me to different doctor. It was waste my time and money. A month later, I got a bill from Dr. Sanjay Agarwal to pay for $38.xx, I was unhappy. I called Dr. Sanji office, ask why charged additional, you told me that Dr. Sanjay Agarwal participated /accepted my plan, and you requested me to pay $20 in front of
