I called around to 7 different Sleep Medicine Clinic's and couldn't get through past and answering machine. Called to Dr. Agarwal 's and got through instantly. Staff was very helpful and friendly over the phone even though I mentioned I was calling around. Eventually booked my appointment with Dr. Agarwal's office. Upon returning my sleep study device the next day, the staff informed me there was a patient who did not show so if I wanted to, I could be seen the same day. Great news!!! So, I was able come in the day prior and have my follow up with results the next day. Amazing. Truly thankful for Dr. Agarwal and his team for being so helpful and accommodating.

Now about the care I received. Dr. Agarwal is highly knowledgeable and was willing to ask all of the hundreds of questions I had. What I would recommend for patients is, Dr. Agarwal can speak a bit fast so do pay attention or ask him to repeat or slow down if needed. Lots of information to share so I was able to fully follow and understand.

My dad had an appointment with him for some sleep issue. Usually it's my older sister who would take him, but this time I was the one who brought him, so obviously I had no idea about this doctor's personality and patients' care like during a visit. Well, my initial impression interacting with him in regards of what needs to be done to my dad that day and to get the best possible result out of that visit was beyond my expectation! I would definitely consider myself to see him in the future for his expertise in his profession. Overall experience was top tier all the way from his staffing to making a follow up appointment from that visit!

Been going to Dr. Agarwal for a few months. Staff is professional and on top of things. Yes at times it gets busy and hectic, but what doctor's office isn't. Dr. Agarwal is very professional and to the point. No sugar coating, which is needed sometimes with stubborn patients (myself included).

I had an appointment with them to go over my test results, and the lab tech didn't complete the results in time for the appointment. After 2 minutes the appointment was over and they asked me to schedule a new appointment. I then had to reschedule the appointment to go over the same test results and I was charged for both appointments. There is such a clear lack of professionalism, first in not completing the results on time for the appointment and secondly then for being double charged.

Each month that I've gotten a bill reminder I've called in to Dr. Agarwal's office to explain this, not once but around 8+ times. They've always said they would remove the duplicate charge. In total I was charged around $850. ~$150/appointment and some other charges including breathing obstruction and sleep tests. Because of the duplicate appointment I paid for everything except the $150.

Update: It's taken over a year but they've removed the charge

I was referred to this office from my employer's on-site clinic. I checked in for an appointment but was never actually seen by the doctor or given an initial consultation. Despite this, I was billed and repeatedly emailed for payment over several months. I've called to get this remediated to no resolution. The charge was also submitted to my insurance, even though no services were provided. Operations needs improvement at this office.

I initially wanted to give this office the benefit of the doubt, as I noticed the staff was in training. My first visit was delayed, with my appointment starting nearly an hour after my scheduled time. On my return visit, I was once again left waiting for the doctor, assisted by a new staff member—which didn't concern me at first. However, when I arrived for a follow-up appointment that had been scheduled, I was told there was no record of it. I had left work early for the visit, only to realize I had made the trip for nothing. The office was too busy to accommodate me.
The final straw came when I began noticing a "no-show" fee appearing in my inbox. I was charged $25 for an appointment that was never scheduled in the first place. When I attempted to dispute the charge, I was essentially accused of lying and was told that nothing could be done to resolve it. My review is for staff which should be 1 star as other than wait time the doctor treated me well and worked to solve my sleeping issues.

My wife was crying after her visit with this rude doctor. She had to wait one hour past her appointment to be seen by Dr. Agarwal for two test results that apparently were positive for COPD and Sleep Apnea.

This doctor has horrible bedside manners. The whole experience was rushed and very unprofessional. He did not explain her diagnosis and was very rude and did not make any time to listen and answer her questions.

On top of the doctor's behavior, the timing of providing the results were unacceptable in my opinion. The tests were performed over 3 months prior this horrible experience.

2 Share

Response from the owner a year ago
Andrew, you never followed any recommendations made to you on your only visit to office in 2021. You sent your wife to office for evaluation for sleep problems. She was not ready to be here either. She never answered questions, argued about suggestion of differential diagnosis and planned work up, and acted entitled to some more servile behavior. Getting delayed in patients rooms is a problem in our office, and the doctor tries to solve each patient comprehensive set of problems including education, and sometimes it takes longer. We try not to intentionally delay folks. We understand this issue and regret about the inconvenience caused to her due to wait. we wish the best of sleep health to both you and your wife.

Dr Agarwal, what can I say. He's been an absolute delight to work with. I am grateful for his patience with me (especially regarding the CPAP issue) I found him to personable and appropriately clinical. He is proactive and works to eliminate your fears through these types of action. I am a big fan!

I highly not recommended this Dr, Dr Sanjay Agarwal. He is so rude and not professional. And very poor services at this Dr office!

- I was referred to this Dr, Dr Sanjay Agarwal. The front office staff called me on 8/15/24, after they received the Referral documents,
My appointment was set on 8/20/24 at 9am.
- I arrived 10 minutes before 9am, and I was the first patient came, I waited outside of this Dr office til 9am, then much longer after, his office is still not opened yet. And the fact that his office business hours, that should be opened at 9am.
I really didn't know what's going on with this Dr's office. If for any delayed reason, there should be a way to communicate with his patients, instead of let the patients waiting outside of his office. This is not professional at all!
- After a long wait, and noticed that I am a first patient in line. Dr Agarwal came in. He immediately yelled at me, "Why are you here? Many patients came to my office and not knowing the reasoning why they are here", and as He tried to look at my record in his system - he found zero data of mine, he continued sound out loud, "How come there is no info about my referral" (1) - He continued yelling, "you took so much of my time", "I have lots of patients awaiting after you" (2) - He was extremely rude!
I was stunned and shocked of How this Dr behaved. I have never met nor seen any Dr behavior so bad like this Dr!
Refer to (1), this tells how bad his office is operate, they received my referral documents three days prior to my appointment, and he found zero data of my record.
Refer to (2), the delay was from his end, and not any sincere wording of apology, or explanation, but yelling at his patient. He is a very bad Dr.
- I was asked to get an Incentive Spirometer at the pharmacy. I was later learned that the prescription is needed to get it, it's not on an counter item. I called his office several times, and I am told that no prescription needed for this item. This means I can never get it!

This is a terrible experience that I had with this Dr. I canceled my follow up appointment.
I informed my family Dr of How's bad Dr Agarwal is, and no patients should get referral to see him!

Dr. Agarwal is a knowledgeable and thoughtful doctor. What can use some improvement is timeliness, but it seems to me that the timeliness is an issue due to him being a caring health professional who is wanting to address all patients and that includes emergencies that come up. Therefore, there is a consistent pattern of every appointment being delayed by 45min or even more than an hour.

I recommend that when you do have an appointment here (in person or virtual), block off plenty of time after it for if your appointment is pushed back. Which there is a high chance it will be from my own experience.

Good marks for quality of care. Lower marks for timeliness (but giving context above to why I think that is happening).

2 Share

Response from the owner 4 years ago
Thank you Andrew for your kind and honest assessment. Your point on timeliness is well taken. I accept its a persistent issue and will continue to try to address this. As you pointed out, delays happen for several reasons, and only few are in my control. We sincerely apologize for the delays causing inconvenience in your work flows. With best regards - Sanjay

My father in law has been seeing Dr. Agarwal since last year and we are very thankful for the care we are receiving. Dr. Agarwal shows a great deal of compassion toward my father in law. Dr. Agarwal seems to remember everything about my father in law's history. This is astounding given the number of patients he sees. You couldn't ask for more from a lung specialist.

Edit: you'll notice that the negative reviews include "bully", "arrogant", and "liar". Wouldn't surprise me what dishonest methods he uses to coerce positive "reviews". He lied about the insurance thing; I checked. It's probably an excuse to deny service based on illegal discrimination.

But get this ... He still sends me spam, that I never consented to nor can I unsubscribe, a flagrant violation of law.

Don't trust a word he says.
Stay away, far far away.

If you notice, so many of the positive reviews sound the same. Makes a person wonder if they are genuine.

You'll also notice how defensive he gets when criticized. It's always the other person's fault. Afraid to take responsibility? Not a trait one would want in a doctor, even just for a sleep clinic.

Fortunately for me, he's selective about which insurance he takes (but will have his staff make an appointment anyway. Not sure why), so I won't be stuck with him.

My sympathies and concerns are with those who must endure being his client.
(I can't wait to see how he'll try to spin another critical review as somehow not his fault).

2 Share

Response from the owner Edited 2 years ago
Mr Brian Westfall, we don't take your insurance and we advised you the same to prevent you getting billed. Your blocking office premises and scaring the front desk staff and clients for more than an hour with histrionics prompted us to call police and escort you out - the first for us in 15 years! Its sad that vendettas and grudges find a way in online reviews without much cross check. Those readers who don't believe this, can check 911 records on June 9th, 2023.

All the reviews here are genuine patients - good or bad.. just like you, but you are NOT even a patient at the clinic. I hope google removes your baseless review. Attempt to use psychological twist in your post or continue to bully your way around as you did in the office are short lived .

My husband & I feel so privileged to have our pulmonary issues & sleep apnea treated by Dr Sanjay Agarwal & his staff! Dr Agarwal has monitored my husband's progress closely after a serious Covid-19 infection nearly 2 years ago. Dr Agarwal has helped me with my asthma & sleep apnea, so much so that I feel more mentally awake & active. Dr Agarwal is focused on educating his patients in modifying life styles in a kind, non-judgmental way, so that we may enjoy better health. We appreciate the expertise Dr Agarwal brings to his specialties, as well as his congeniality. Thank you, Dr Agarwal!!

In general, my visits with Dr. Agarwal were very personable and comfortable which I like very much. First, the staff were very nice, very patient, and very helpful. They gave me clear instructions and explained to me carefully what I need to do before the visit, like reminders, and told me how things are because I am a new patient. I needed to schedule an x-ray and all the tests, and they helped me through it all. Waiting in the office was not too bad, I waited about 10 minutes. When I saw the doctor, he took the time to understand my background and health history. He considered all the aspects of my health that may complicate the presenting concern. The doctor seemed very knowledgeable and caring. He took time to explain my condition and my treatment options with possible side effects. He is the best pulmonologist I have ever met. Dr. Agarwal was the first doctor to be able to figure out the root cause of my conditions after decades of misdiagnosis by other doctors. Finally, after almost 40 years, my condition started to improve. Even after I moved out of the county, I continued to see Dr. Agarwal by Zoom because I did want to try to find a different doctor as good as him.

My father was referred to this doctor to do a sleep study so he could get a CPAP machine. This doctor already gave us a terrible experience from the start when we waited an hour just to speak to him about his sleep study results, when the conversation lasted 10 minutes. My dad went back to this doctor for a follow up appointment after using the CPAP machine for a month and he immediately yelled at my dad asking why he has that CPAP machine. When this doctor ordered the machine....and never explained the results to my dad. I've worked with many doctors and this is definitely not someone I would recommend to my own patients. This doctor is not a compassionate human being, I would not recommend this doctor to anyone. He is inconsiderate of your time and lacks communication skills.

3 Share

Response from the owner Edited 2 years ago
Being a healthcare professional yourself you probably have understanding of its complexities. Maybe you should have accompanied your father to the office visits, or called us to clarify and address communication gaps. LUNA or other low quality CPAPs that the DME companies push, for increased profit margins, have several limitations and not clinically satisfactory, while DME's will brainwash you otherwise. We still don't have data on the CPAP

Response from the owner Edited 2 years ago
Being a healthcare professional yourself you probably have understanding of its complexities. Maybe you should have accompanied your father to the office visits, or called us to clarify and address communication gaps. LUNA or other low quality CPAPs that the DME companies push, for increased profit margins, have several limitations and not clinically satisfactory, while DME's will brainwash you otherwise. We still don't have data on the CPAP usage that is needed by the insurance company to pay for it. All these were explained to your father but unfortunately, not sure how much he understood. All you had to do was to give us a call, if you did not understand either.

We apologize that we don't manufacture or dispense CPAP machines (as your father suggested) and we give appropriate unhindered time to each patient, that sometimes increases wait time for other patients. Since your father thought that he is right and was persistent on putting forth his points, sense of time disappears and frustration creeps in. Please do consider taking a second opinion for his several sleep issues and pay out of pocket for a new machine, when the LUNA machine gets bad early and insurance company declines paying for a new one. Best wishes

(Copied from my google review)
A little late, but a much-deserved review. I came to Dr. Agarwal almost 5 years ago to be seen for Sleep Apnea. I was initially with Kaiser and was told that, while I did have sleep apnea, my condition did not need any treatment despite my sharing with them my inability to stay awake during the day (even dosed off at a work meeting).
After switching insurances, I googled around to find Dr. Agarwal and came in to receive a sleep study where it was discovered that the testing done at Kaiser was not done correctly, and I did need to receive treatment for my sleep apnea. I have moved out of the area but can still connect with Dr. Agarwal, thanks to virtual meetings. He has been thorough in providing me insight into my condition and has answered each question I have presented to him.

5 years later, I have noticed a difference in my energy levels, and I feel more rested than I could remember.

I took my mom to Dr. Agarwal twice and we definitely will not go back any more. Both times, he will not even come in the examine room to check on her, just standing by the door and asked a few questions. He ordered lung function test and did not even discuss what the results were. I do not think he cares about the patient at all.

6 Share

Response from the owner 4 years ago
We respect your opinion and perspective. Auscultation of the lungs is not always needed (google 'evidence based medicine' and 'lung auscultation' and read up some NIH NCBI articles) especially in Covid times when you try to minimize contact to save our patients, and staff. You decided to hide your full name and it is hard to know the patient, but most likely your mother is not very sick and had normal x-rays and pulmonary function test as I review the records prior to seeing my patients. I have been in the critical care and pulmonary field taking care of really sick patients in the ICU or Pulmonary cases in office and I am proud of my good patient care. That said I value your assessment. I will be happy to answer your questions - if you call the office with your mothers information - even with you choosing another specialist, and if not, I wish you and your mother health and peace in 2022.

1st appointment (1 hr late)
2nd appointment by Zoom (no show)
3rd appointment by Phone (no show again)
Billed for 1 appointment, 2 tests, totaling 3 charges with 0 follow-up

The doctor left a voicemail "apologizing" for his no shows while blaming that his patients often ask a lot of questions and he just can't get them to "SHUT UP".

There's a reason his schedule seems so available compared to other pulmonologists/sleep doctors.

Would it be possible that the doctor jam packs his schedule and treats patients as dollar signs?

He left me feeling like a transaction, not a patient.

- UPDATE 1/4/2021 (reply to business owner)

Nothing "vengeful", just facts:

I still have the doctor's voicemail apologizing and blaming the no show on patients.
I still have my log history showing the Zoom wait time, and real # of call attempts made.

Best of luck to everyone in finding a good doctor.

We are not surprised that this vengeful post is on several sites. Per my review with Dr A and staff, six attempts to book follow up visit after your consult 5 months ago, were unsuccessful as your GOOGLE PHONE either rejects it or Voice messages are unreturned. You hung up after waiting for only 4 min on Zoom follow up; and Dr A called you during vacation for a 'Face time' visit, but your google phone blocked him again. We can only do so much and request folks to be proactive in their healthcare.

Its SAD that you painted such a negative image, by play of words, but its true that some patients are sicker or take a longer time to comprehend test results/ care plan but we try our best to help our multilingual patients, whatever it takes to get the message across including education in the room. Payment for a patient visit is fixed by insurance companies leaving us no choice. Just because we bent over backwards to accommodate you does not mean we are not busy like other 'pulmonologists'. You will still need to pay your deductible as its illegal to write it off and calling staff repeatedly is not going to change it. We wish you the best in finding another specialist and an optimum health in 2022 - Manager.

Doctor Sanjay is knowledgeable about his field, friendly and take good care of his patients.
I have to edit my previous review on this doctor because his service is no longer as good as before. I have my lung damaged due to COVID and need a special medication to help soften the tissue of my lungs. He refused and did not fax the right documents that were required by insurance so that they can approve the coverage for Pirfenidone 801mg tablet.
I was seeing him on 10/19/2022 and paid $50 copay plus he will bill insurance for office visit but what I got from this appointment was arguments between him and pharmaceutical manufacturer who is in process of providing free medicine for my treatment.
Add on to the issue, his office never picks up the phone, I have to call 4 to 5 times a day to get a hold of someone.
I am very disappointed with his service and attitude toward his patient and the Rep. of Genetech.

Very poor service absolutely. I am extremely disappointed with the service at this clinic. They are so aggorant. Despite scheduling appointments in advance, I am always forced to wait for a long tine, more than one hour. Every time I arrive, I am told to wait even longer, and this has happened multiple times. As a patient, I feel that my time is not valued.

Dr. Agarwal is a wonderful doctor that my mom has been working with for the last few years. He is caring and understanding and really tries hard to give my mom the best care he can to improve her wellbeing

The Doctor is very through and spends a great deal of time explaining every detail to me
Asks me questions
Makes me feel comfortable and has great bedside manners
I'm very satisfied and know that I'm in good hands
He rates as a five

I can't get anyone to answer the phone or return my calls or emails to set up an appointment for my referral. Red flags!!!

I was here a bit after 11am for an 11:30 Appt and ended up waiting for more than 1.5 hr and saw the doctor after 12:30 pm, seeing lot of patients here waiting and they are squeezing in appts for other days. Really bad experience!

Feed back well received. Timing and tardiness have always been our challenges as we don't track of time when in patient's room. Some patients take a 5-10 min and some longer - especially elderly or those with several complex medical problems or urgent walk ins or language barriers among common ones. We will try to improve ...

Not an ideal doctor. The only specialist encountered that does not explain real condition of the patient. He discourages questions.Staff are inefficient. Regretted the time seeing him.
